

2. Inainte de a monta bateria, curatati tevile cu apa. Pozionati bateria si garniturile dupa care strangeti piulitele de fixare.

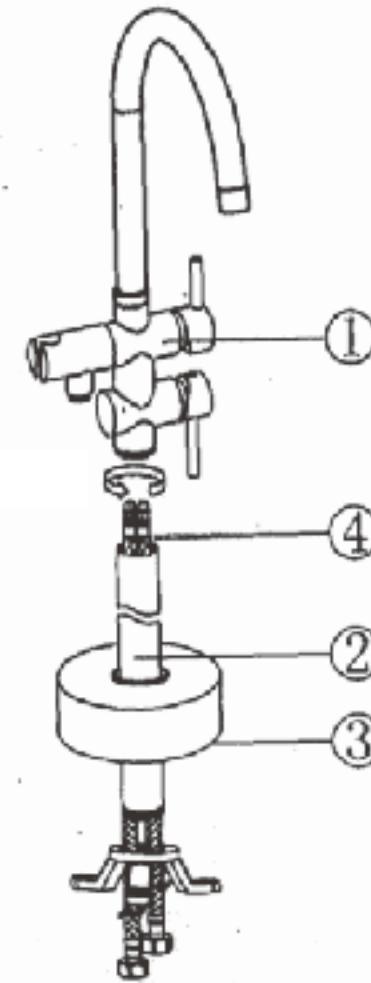

3. Montati furtunul de dus si strangeti piulitele, atentie nu folositi unelte, acestea se strang doar cu mana. Acum puteti deschide robinetii de alimentare si verificati daca sunt eventuale prierderi de apa.

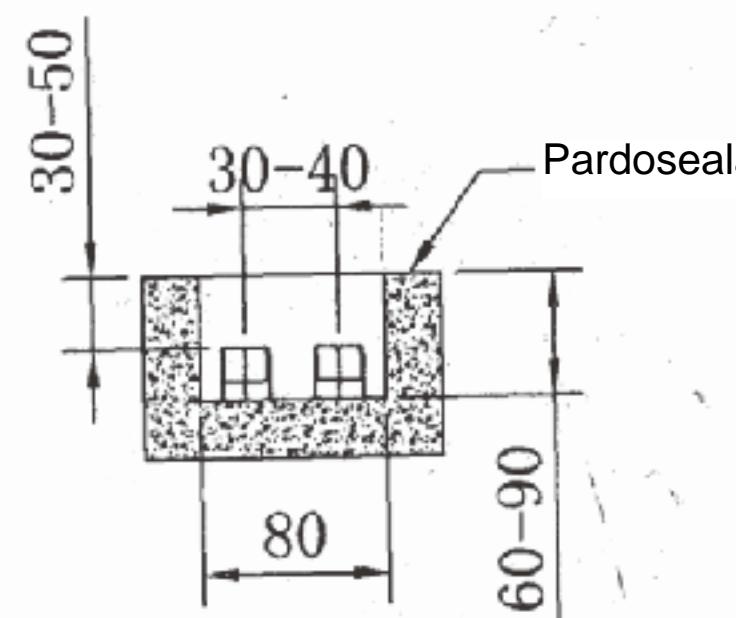

1. Inainte de a monta bateria, curatati tevile, la interior, cu apa. Pozionati si asamblati tevile pe stativ. Montati racordurile de alimentare, in partea stanga apa calda - in partea dreapta apa rece, si racordati la alimentarea cu apa locala.  
Asigurati-vă ca robinetii de apa sunt pe poziția închis.

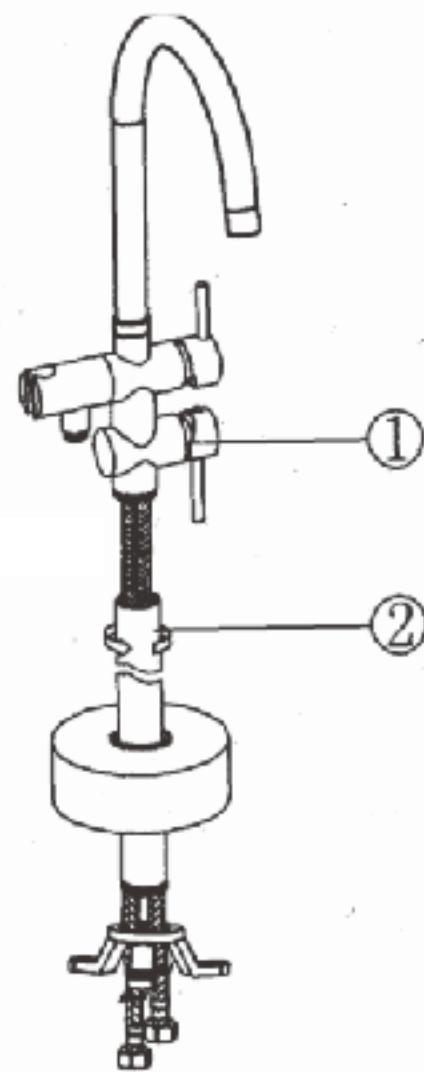

1. Montati furtunele de apa calda si rece (4) si strangeti, atentie nu folositi unelte, acestea se strang doar cu mana.

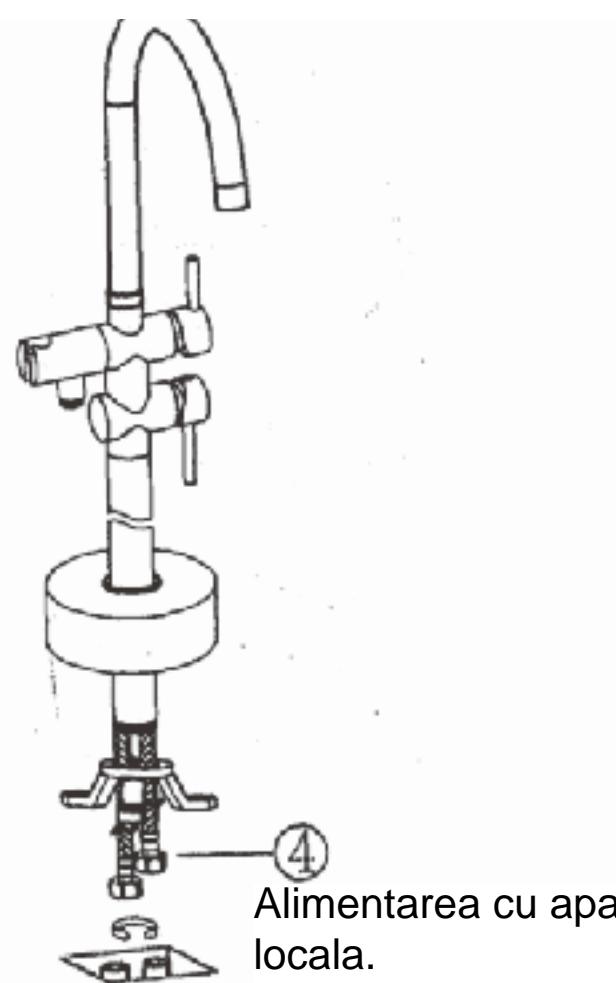

Alimentarea la reteaua locala de apa calda/rece se va configura conform schitei de mai jos, dimensiuni in mm.

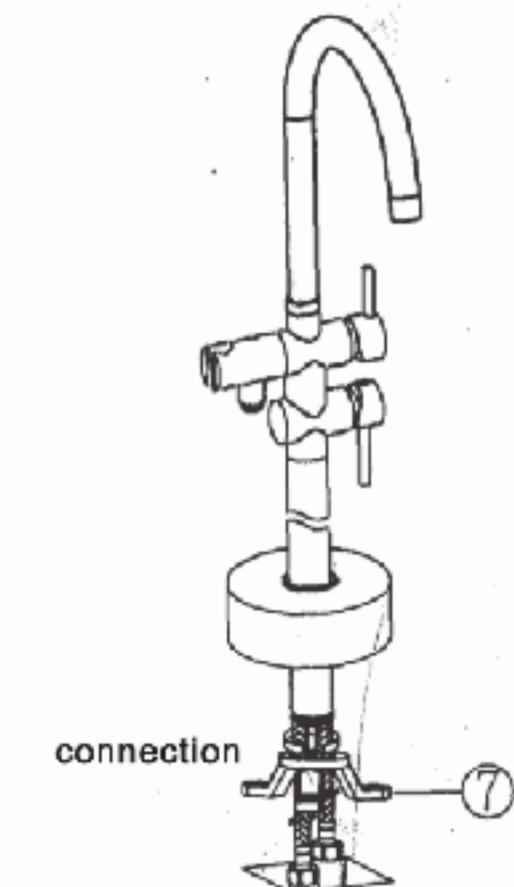

2. Infiletati tubul (2) principal de la piciorul bateriei in corpul bateriei (1). Pozitionati ornamentalul piciorului (3).

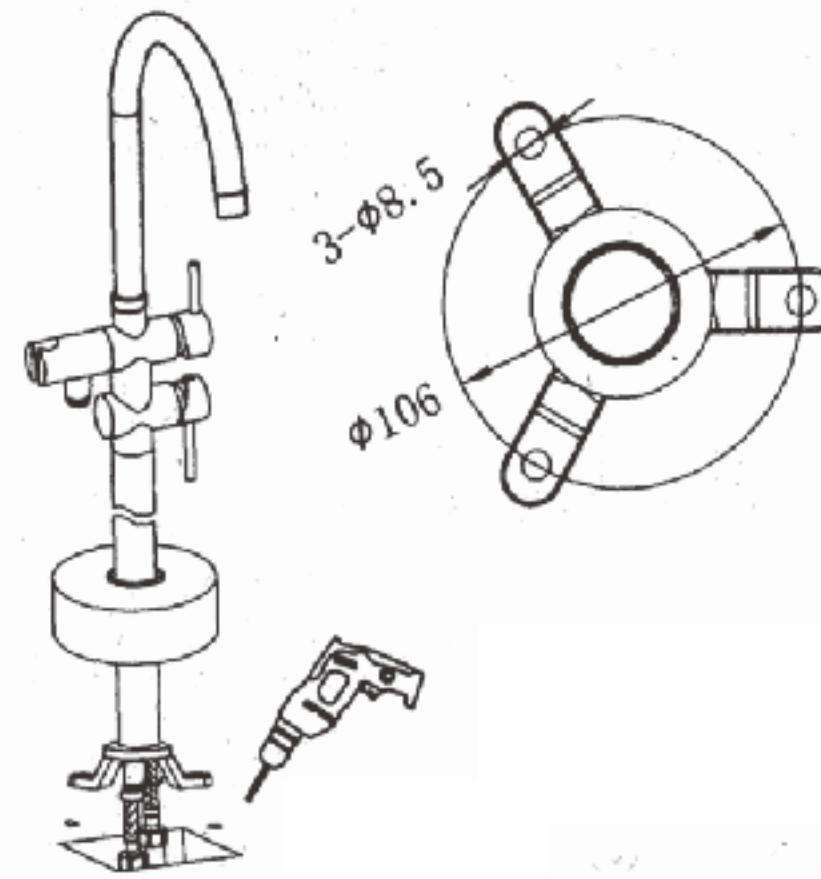

3. Racordati furtunele de apa calda/rece (4) la alimentarea cu apa locala. Acum puteti deschide robinetii de alimentare si verificati daca sunt eventuale prierderi de apa.

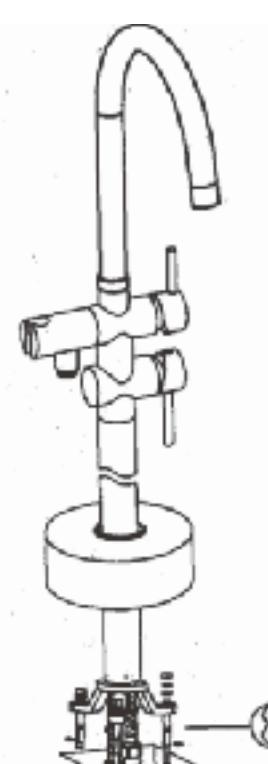

4. Infiletati stativul de jos al bateriei (7) in tubul principal (2).

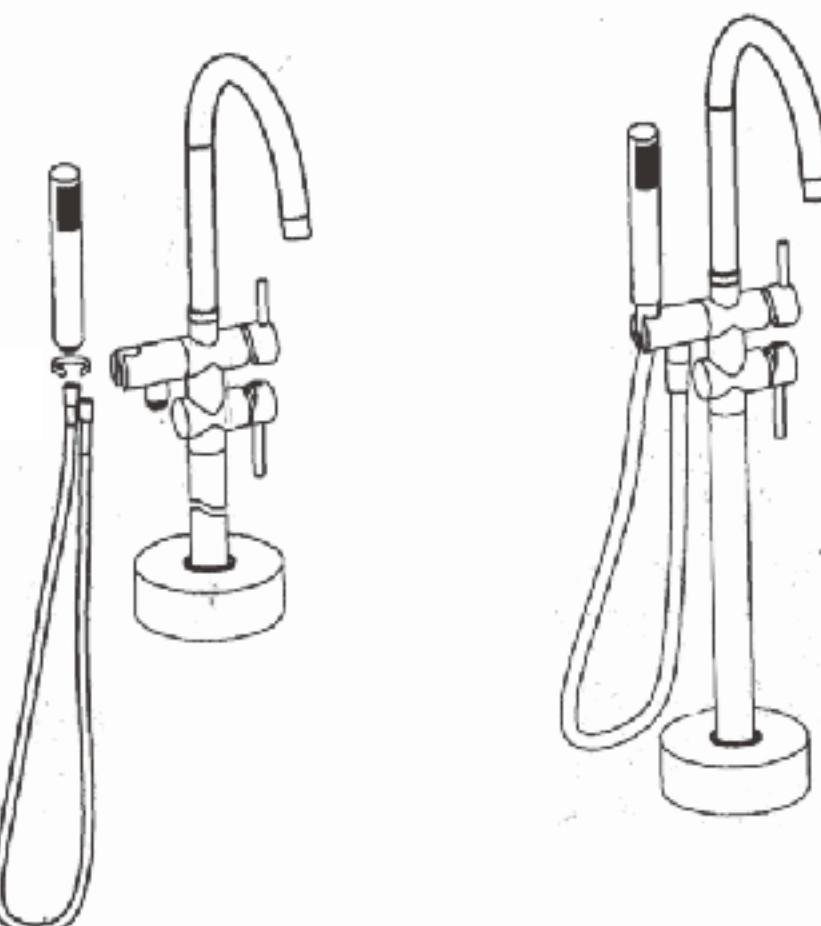

5. Forati gaurile pentru fixarea stativului.

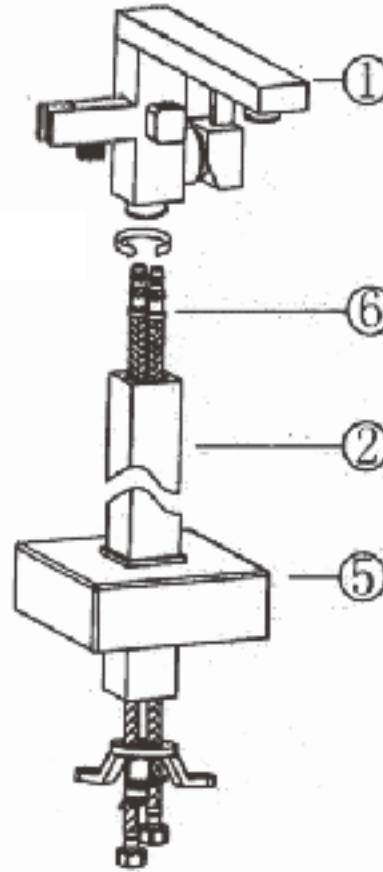

6. Pozitionati si fixati bateria in gaurile forate, cu ajutorul suruburilor cu diblu (8).

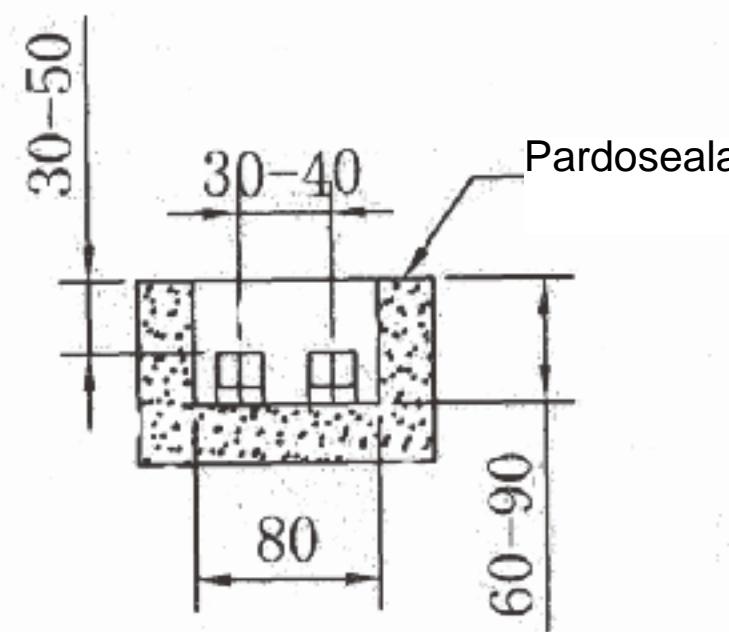

7. Montati furtunul si dispersorul de dus.  
8. Bateria la finalul montajului.

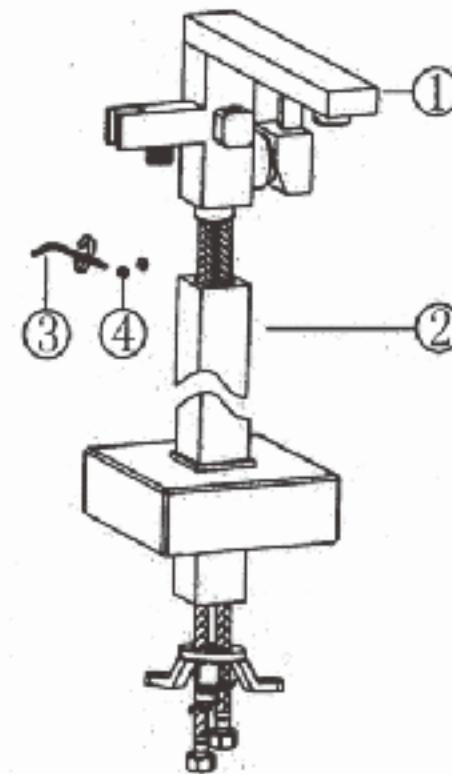

1. Montati furtunele de apa calda si rece (6) si strangeti, atentie nu folositi unelte, acestea se strang doar cu mana.

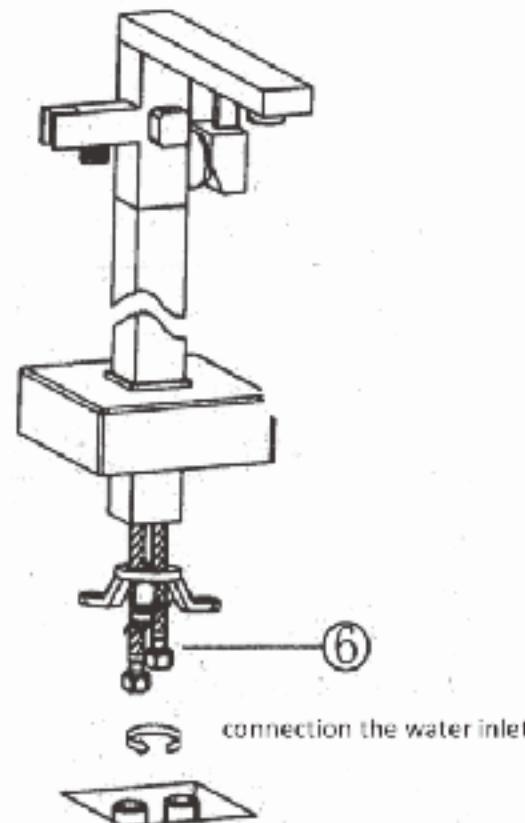

Alimentarea la reteaua locala de apa calda/rece se va configura conform schitei de mai jos, dimensiuni in mm.

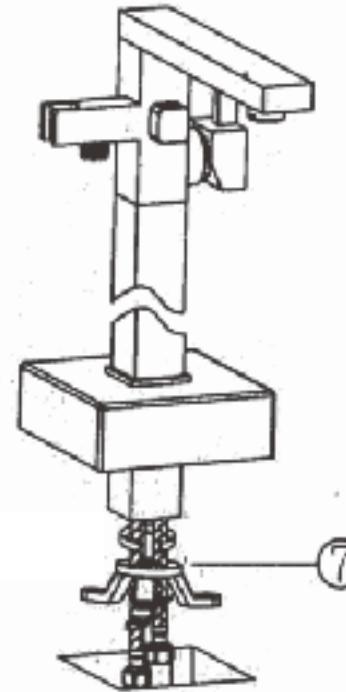

2. Montati tubul (2) principal de la piciorul bateriei in corpul bateriei (1) cu ajutorul unei chei hexagonale (3) si a surubului (4). Pozitionati ornamentalul piciorului (5).

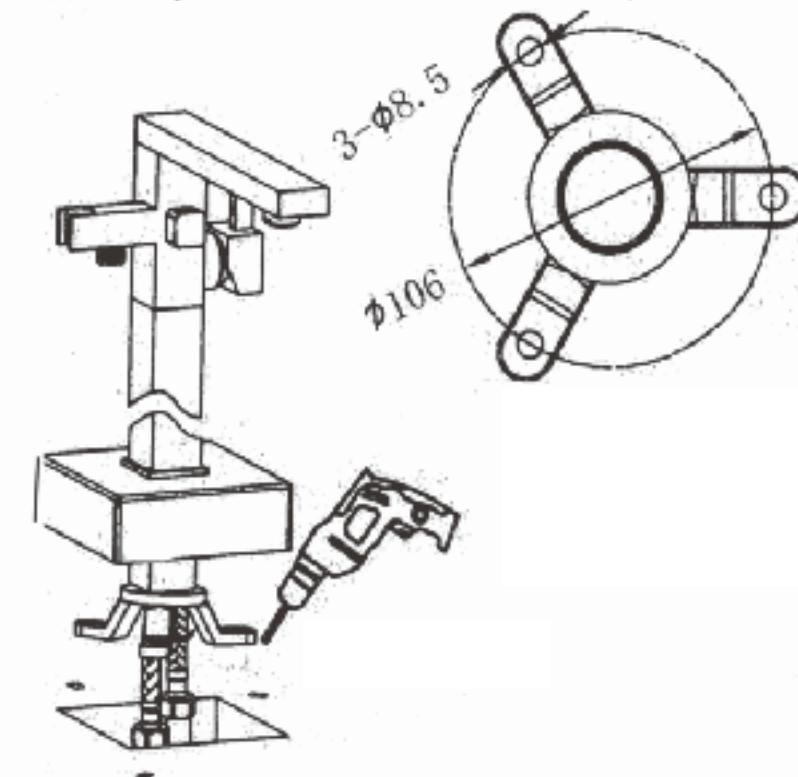

3. Raccordati furtunele de apa calda/rece (6) la alimentarea cu apa locala. Acum puteti deschide robinetii de alimentare si verificati daca sunt eventuale pierderi de apa.

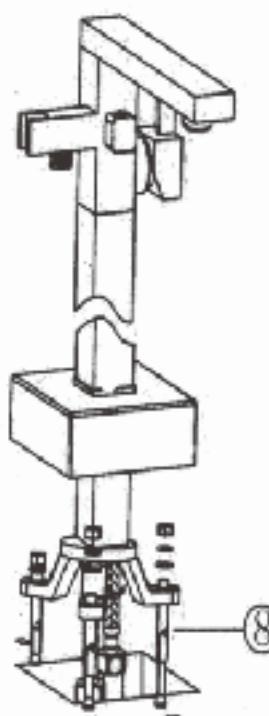

4. Infiletati stativul de jos al bateriei (7) in tubul principal (2).

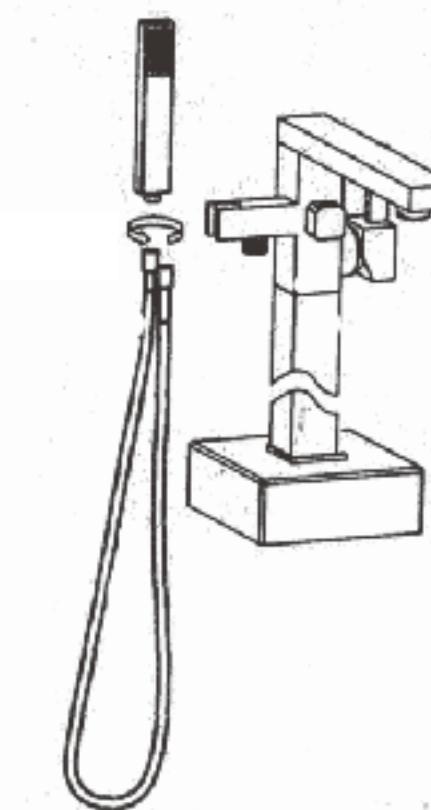

5. Forati gaurile pentru fixarea stativului.

6. Pozitionati si fixati bateria in gaurile forate., cu ajutorul suruburilor cu diblu (8).

7. Montati furtunul si dispersorul de dus.

8. Bateria la finalul montajului.
